

# North Main and Auburn roundabout plans

When constructed in 2011, this will be the area's first two-lane roundabout. It'll handle 30,000 vehicles a day with minimal delays and be able to handle the 50,000 a day projected for the intersection by 2030.

## Tips on using a roundabout

- ◆ As you approach, get in the appropriate lane: right turns in the outside lane, left turns or U-turns in the inside lane, straight traffic in either lane.
- ◆ After passing the street before your exit, signal for your turn, wait for a gap in traffic, then exit.
- ◆ Be aware of traffic in the other lane.
- ◆ Obey pavement markings.
